

ABSTRACT OF THE DISCLOSURE

## INSULATING LABEL STOCK

- 5           An insulating label stock includes a thermal  
insulating layer, which may a fiberfill batt. The batt  
is laminated to at least one layer of film, paper or  
fabric. The label stock can be wrapped around a  
container, such as a can, bottle or pouch. The label  
10 stock may be coated with a coating material so that it  
is printable, thus imparting both insulating properties  
and print capability to a container.
